

BIOMEDICAL SITUATIONAL ANALYSIS QUESTIONNAIRE

REVISED SITUATIONAL ANALYSIS – 2023

This questionnaire is based on the SSCSIP ‘Pacific Biomedical Standards’ document 2014. Its purpose is to give an indication of how each country is progressing with medical equipment management and plot a pathway to improvement.

The results will be analysed and forwarded to PICs and will be shared at the Pacific Biomedical Network (PBN) Meeting in May 2023.

COUNTRY	SCRIBE	DATE COMPILED

BIOMEDICAL SERVICES ARE:	Δ In-house	Δ Out-sourced

Please indicate as a percentage out of 100%. If all services are conducted in-country by MOH staff then indicate only “in-house”. Out-sourced examples include maintenance service contract agreement, contracted visiting engineer/technician etc.

SECTION 1: FINANCE

Is Finance Available For:	Not Applicable	Never	Rarely	Often	Mostly	Always
i. Replacement of un-repairable medical equipment?						
ii. Purchase of spare parts?						
iii. Purchase of: - tools, - test equipment - consumables - asset management unit?						
iv. Service contracts?						
v. Out-sourcing of biomedical repair services?						
vi. Required biomedical workforce?						
vii. Equipment trainings: - user - service

REVISED SITUATIONAL ANALYSIS – 2023

SECTION 2: NATIONAL MEDICAL EQUIPMENT POLICY DOCUMENT

a. Is your National Medical Equipment Policy?					
○	○	○	○	○	○
Non-existent	Planned	Drafted	Approved	Implemented	Implemented & Regularly reviewed

b. Does your National Policy Document Contain Sections on:		No	Yes
i.	Terms Of Reference of a National Medical Equipment Committee or equivalent?		
ii.	Membership of a National Medical Equipment Committee or equivalent?		
iii.	Carrying out cost benefit analysis of new medical technology before introduction?		
iv.	Purchasing equipment?		
v.	Purchasing parts?		
vi.	Accepting medical equipment before first clinical use?		
vii.	Training of users and first line maintenance of medical equipment?		
viii.	Training of technical staff of medical equipment?		
ix.	Repairing medical equipment?		
x.	Maintaining medical equipment?		
xi.	Actions on hazard alerts and recalls?		
xii.	Investigation and rectification of adverse events involving medical equipment?		
xiii.	Decommissioning and disposal of equipment?		
xiv.	Work documentation and reporting to management?

SECTION 3: NATIONAL EQUIPMENT COMMITTEE OR EQUIVALENT

a. A Committee to Discuss Equipment Issues Is:

☐	☐	☐	☐	☐	☐
Non-existent	Planned	Drafted	Approved	Exist but non-active	Exists and active

b. Does your National Medical Equipment Committee or Equivalent Provide For:

	No	Yes
i. Overseeing Medical Equipment Management?		
ii. Consideration of cost benefit analysis of new medical technology proposals before introduction?		
iii. Prioritisation of procurement to maximise the national benefit from available resources?		
iv. Provision of adequate staffing and budget for the work-load of the Biomedical Department?		
v. Assistance in the implementation of the National Equipment Policy?		
vi. Reporting to senior management?

SECTION 4: BIOMEDICAL PROCEDURE MANUAL

a. A Biomedical Procedure Manual Is:

☐	☐	☐	☐	☐	☐
Non-existent	Planned	Drafted	Approved	Implemented	Implemented & Regularly reviewed

b. Does your Biomedical Procedure Manual Include:		No	Yes
i.	Job descriptions for each position in the department or ToR for the contracted Biomedical Engineer/technician?		
ii.	Step-by-step instructions of procurement process of medical equipment including approved specifications and genuine national requirement before first clinical use?		
iii.	Step-by-step instructions for the acceptance and documentation of all medical equipment before first clinical use?		
iv.	Step-by-step instructions for the performance and documentation of repair tasks?		
v.	Step-by-step instructions for the performance and documentation of scheduled maintenance of medical equipment?		
vi.	Step-by-step instructions for action on Hazard Alerts and Recalls including liaison with medical staff, corrective action and documentation?		
vii.	Step-by-step instructions for the investigation and rectification of adverse events involving medical equipment?		
viii.	Step-by-step instructions for the decommissioning and disposal of medical equipment?		
ix.	Instructions for documenting and reporting work done by biomedical staff?		
x.	Continuous professional development training requirement of biomedical staff?		

c. Does the Implementation of your Procedure Manual Ensure:		No	Yes
i.	Adequate numbers of technical staff are employed to ensure all tasks assigned to the Biomedical Department are adequately performed?		
ii.	All technical staff have adequate technical education and training to competently perform the tasks assigned them?		
iii.	All staff are familiar with the detailed requirements of the Procedure Manual for all jobs they are required to perform?		
iv.	Service manuals, tools and specialised test equipment are available for the required tasks?		
v.	Work reporting systems are in place to ensure the accurate recording of work performed by your staff?
